CROATIA TEST TRACK

Gornja Bistra (6,10 km)

The Gornja Bistra test stage offers 6.10 km of pure driving excitement in one direction. With its twisty layout packed with corners - including several dramatic hairpins - this stage is a true playground for drivers. Depending on direction, it challenges competitors with a steady climb uphill or an intense downhill rush, while roundabouts at both ends provide a perfect flow and natural turning points. This test stage has no road section, meaning no time is wasted on transfers - every kilometer can be fully dedicated to testing the car. The road surface is high-grip black tarmac, considered excellent by Croatian standards, ensuring maximum performance and confidence behind the wheel. The service park is set on spacious gravel grounds, designed to accommodate everything from large team trucks and vans to personal cars and catering facilities. With plenty of room and an on-site water supply, it provides all the essentials for a smooth and professional rally experience.
